2. Procedure

2.1 Procedure

Title:	Current Research Information System 2026
Description:	The current procurement process aims to identify a future-proof CRIS solution that aligns with TU Delft's evolving needs, including enhanced interoperability, improved metadata quality, and support for a wider range of research outputs. The system must facilitate the management of high-quality data related to research information, robust data integration with other sources, reporting tools, while ensuring compliance with national and international standards. TU Delft wants to continue to build a high-quality collection of academic (research) outputs that is indicative of the TU Delft academic vision, goals and ambitions over the course of time. The CRIS is the system in which this collection is managed and distributed to other sources, and it serves as a reliable single resource for current and previous TU Delft outputs. This enables the sharing of metadata within the broader infrastructure of TU Delft, as well as internal reporting, analysis and dissemination. The CRIS has a current population of approximately 3100 users
