

#	Page / chapter / paragraph	Question	Answer
1.	n/a	<p>Why is the process of converting pulled apart in separate parts? You are now only asking for an ICT solution. Can we compose an answer to this survey based on a manual conversion mixed with an/our ICT component?</p> <p>Our knowledge and experience is that the technical ICT solution is a small and integral part of the overall solution. Our experience is that a maximum of 20% can be carried out by means of optical (character) recognition and the rest by using human capacity, for doing the conversion but also for building up a metadata-system.</p>	<p>The reason we separated the two parts of the solution (manual and automatic) is because we want to have an estimation of the percentage that can be done automatically. We hope it can be higher than the 20% that is mentioned by you.</p>
