Notice: market consultation has ended, possibility to
submit screenshots and demolinks

Dear Madam/Sir,

The market consultation regarding Icy Road Alarm Systems has ended per the 7th of November 2016 and I hereby would like to thank you again for your contribution. Your information helps us in creating a better understanding regarding the available standard solutions of Icy Road Alarm Systems.

A few parties have indicated that they have a standard solution that complies with many wishes of Rijkswaterstaat. We have asked these parties free of obligation to submit screenshots or demolinks of their solution. With that information Rijkswaterstaat hopes to gain a better insight into the contemporary design of user interfaces of Icy Road Alarm Systems.

Parties that are willing to provide additional insight are welcome to send screenshots or demolinks of their application to civ-offerte@rws.nl. This is of course entirely free of obligation and does not form a part of a request to tender.

We are particularly interested in screenshots or demolinks of R2, R4, R5, R14 and R16 of the market consultation questionnaire.

Yours sincerely,

Timo Martosatiman
Procurement Consultant
